

You Draw it, We'll Build it

RAM
FABRICATION AND WELDING SERVICES

Brass / Bronze Works

Did you know that RAM Fabrication can work with Brass or Bronze.

Here is an example of our work done at a heritage project in the CBD.

This is a very specialised industry, but our skilled tradesmen can incorporate Brass or Bronze into balustrading for commercial applications. It is becoming a popular choice for architects as it reflects a premium quality product for the more discerning clients.

2015 Contract Completions

- Butler College (Perkins Builders)
- Midland Health Campus (Brookfield Multiplex)
- City of Perth Library (Doric Group)

South Tower Project

In 2015, RAM Fabrication was called in to rectify an inferior balustrading product (done by a competitor). RAM Fab is known in the industry for providing top quality products. The RAM Fab boys worked during the night for 1 week to ensure the job was completed as a matter of urgency.

For more information on each project or to see photos of our work, visit www.ramfab.com.au

DID YOU KNOW?
The most common metal found in the Earth's crust is...
Aluminium
