FABRICATION AND WELDING SERVICES

## WA Construction Awards

Congratulations to Doric Contractors who won "Best Fitout" for the City of Perth Library and Brookfield Multiplex who won "Best Health Building" for the Midland Health Campus (pictured left).

RAM Fabrication is proud to have been a Subcontractor on both of these projects, showcasing the best of the best in Perth.

## Brass is making a comeback!

Popular in the early part of the 1900's, we are receiving more and more enquiries about Brass Handrails as architects strive to achieve a certain look.

People choose Brass for either historical applications such as heritage buildings or for a prestigious look in a hotel lobby or ballroom.

Contact us for more information or to price your next project.

## Stainless Steel Specialists

Beautiful Water Spout Features manufactured and installed in highly polished 316 marine grade Stainless Steel for a pool in Mandurah for our client Aquatic Developments.

Did you know that RAM Fab can install Car Park accessories? (such as these wheel stops in a car park in Ascot)

### We are moving!

The RAM Fab workshop is up for sale by the building owner. So we will be moving in the near future. We'll keep you informed on the move, so stay tuned for more information...

RAM Fabrication is West Australian owned and operated.
